NRO

1. This memorandum is for information only.
2. Office of Special Activities has not participated in the evaluation noted. As several versions of the proposal have been presented, it is uncertain which version General Greer evaluated. Because of our lack of participation, it is difficult to answer the comments directly.
3. Office of Special Activities has been holding up the evaluation of this proposal awaiting the flight test results of the 240" experimental camera to be flown in the near future, as well as [redacted] LANYARD. If evaluation is desirable at this time, I feel that two or three people should spend about one week going over the problem in detail.
4. The question raised by General Greer in paragraph 2 with regard to the overall problem of obtaining [redacted] is well taken, and it is for this reason that we feel that the technical evaluation of the products of existing high-resolution systems should be made prior to embarking on the next development stage, such as the ITEK-LMSC 150" system.
